

Social Media Takeover

- General Notes 2
- Monetization 3
- Instagram Limits 4
- Instagram Logic 5-6
- Twitter
- YouTube
- Facebook

General Notes

Open tabs in background to run scrape, then save in localStorage to report back to main page. Set a localStorage flag for "is running scrape XYZ" then setInterval to check when that flag is flipped. Scraping is done and stored in localStorage XYZ. Trigger event handler to handle this data.

Add floating menu to control app. Inject html/css on page.

Inject buttons on page. Have "Blacklist" button next to follow.

Have "Global Followers Gained" to find likes per follow avg.

Monetization

- 1 week free trial
- \$2 per week
- \$25 for 6 months

- Every week, authorize with server
- Generate key with Username
- Check key against db, end date and current date
- Add free week for bug fixes.

- Pay me on my website.
- On payment complete, add time to db.

Instagram Notes

- Like 100 per hour for 5 hours a day
- 12pm-5pm is prime time
- Stop at 500 likes
- Every 10 likes, Follow/unfollow
- Switch every follow/unfollow
- 25 follows and 25 unfollows per day
- Add top post users to blacklist dynamically
- "Enqueued for unfollow" button
- Like post then add user to "temp black list", a list of 100 users.
- Push auto followed users to unfollow list. Unfollow list must be 200 users large before unfollow.
- Highlight no follow back users

Instagram Logic

Have initial setup for

- Get current username
- Get relevant tags
- Get blacklist

Day/Session startup

- Reset all flags
- Reset counts and start time
- Start likes function

Likes

- 100 per hour for 5 hours
- Ramp up to 8 hours later
- Skip black list
- Skip posts with too many likes
- Skip already liked posts

Instagram Logic

Follow

- Follow if not already
- Check follows is only 15% or 50 users less than followers
- Follows less than 2000 users

Unfollows

- Pull from list of no follow backs
- Make sure I dont follow
- Scrape no follow back
- Scrap list I follow and follow me
- Store difference as no follow back
- Continue to unfollow function

Set switch statement for daily start, like, scrape, follow/unfollow using flags.
